

FINANCIAL SERVICES FIRM CASE STUDY

Client Profile

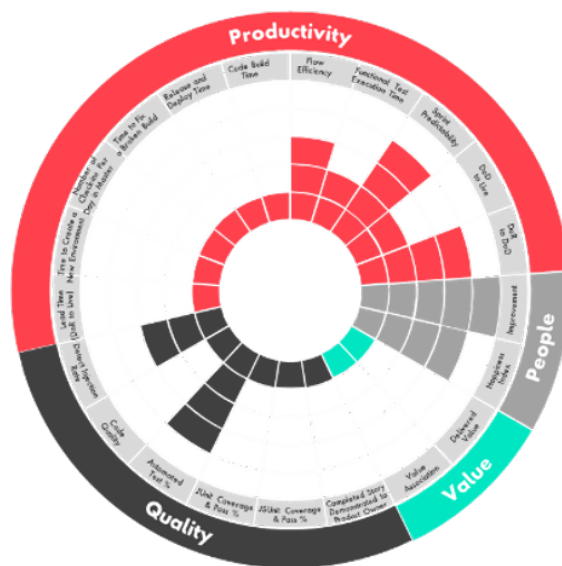

Large UK based bank that offers Wealth, Private, Investment and Asset Management services .

DEVOPS IMPLEMENTATION

Key Challenges

- *Slow and manual engineering processes .*
- *Low collaboration and teamwork due to lack of effective processes and tools.*
- *Poor quality of software due to manual testing .*
- *Speed to market longer than competition .*

Solutions

- *Evaluated all platform systems and prioritized systems with highest potential .*

- *Conducted current state assessment across Value streams .*
- *Through engineering interventions, improved system efficiencies and speed of delivery .*
- *Implemented new ways of working and trained colleagues on new ways of working .*

The Results

EFFICIENCY

ENABLEMENT

SPEED

EMPLOYEE ENGAGEMENT

- *Adoption of Devops pipeline with Git, TeamCity, Docker, Ansible tools .*
- *Increase in number of releases in a year from 10 to 15 .*
- *Increase in test automation from 20% to 50% for P1, P2 scenarios .*
- *Improved cycle time from Backlog to Production from 6 months to 90 days .*
- *Reduced waste in engineering efforts .*
- *Reduced defects rate from 25% to 10% in SIT and UAT .*
- *Improved employee happiness .*
